Sync Wireless Electronic Headsets

Tune out the background noise.

Tune into your mobile phone.

PUSHBUTTON PAIRING. UNPARALLELED PROTECTION.

Block background noise.
Open up your options.

Comfortable, cohesive, and effective hearing protection with Honeywell Sync™ Wireless Headset Range.

This product delivers premium noise protection combined with a streamlined design that allows easy control of the mobile devices or built in FM radio with the touch of a button, even if the user is wearing bulky gloves. Making phone calls and listening to audio files is no longer a hassle, but a simple procedure. Day-to-day operation is easy too – the product's ergonomic design includes one-handed access to volume controls and flashing lights that indicate alerts at a glance. The end result? An intuitive, effective, and user-friendly interface. No more fumbling around.

Clear communication and safety are never compromised. Although users can listen to their mobile devices through Bluetooth™ or built-in FM radio, they get high passive noise protection, which protects against up to 90% of workplace noise in applications such as those found in the construction, agriculture, and forestry industries. But the important sounds of the workplace – like alarms, warning signals, and co-worker's voices – are possible to hear at safe levels.

Go ahead. Keep your gloves on. Get Sync Wireless Earmuffs to block out the noise and open up your options.

SYNC WIRELESS HEADSET COMPARISON

Sync Wireless Earmuffs are high quality headgear that protect users from hazardous noise while keeping them connected to what matters.
